

New access requirements in place for Waste Treatment Plant site

Now that construction activities have begun at the Waste Treatment Plant site, all personnel desiring access will need a WTP construction badge or a WTP visitor escort required badge. This includes Department of Energy contractors who may need access to work on utilities, equipment, the DOE electrical substation or similar activities on the WTP construction site.

A WTP construction site badge is for those who need frequent access. Applicants for the badge must attend the WTP site safety orientation and complete drug screening before a WTP construction site badge can be issued. To arrange for the WTP training orientation class, please contact Charles Herbert, WTP training coordinator, at 371-5019.

For those who already have a DOE Hanford Site badge or visitor badge and make infrequent visits to the WTP site, a WTP escort required badge and on-site escort are required. To arrange for entry, a WTP escort required badge and an escort, contact Lee Leingang at 371-5538 or at 530-6317 (pager). ♦
